MINERABLE SNOW.

BY WM. LAMSAT.

See the snow, the pitilessenow, Driving end whirling whenever you go ! Meeting the treveler wherever he turns, Pelting his foce, till the fish elmost burns Flying and eddying everywhere. Making the lendscape dismal and drear. Nothing et ell can compare, that we know, With horrible, gastly, dismal snow-

Oh, the dreary, miserable snow! Making our spirits grow moody and low, Wetting our feet, if we chence to go out, Keeping us housed so we can't gel about. Snow bound, and wanting to visit a friend Patience herself, would her raven locks rend; Nothing on earth, or the regions halow, Comperes to the heteful, despisable snow.

See how it seeks out the chinks and the crocks, Making us shudder, though little It racke, Finding the smallest imaginable space, Filling the room in its meddening race; Under the doorways, windows and all, Sweeping through chinks where knot couldn't

Of ell the vile plagnes that old nature heatows There is none to compere to the misarable

Oh, the snow, the miserehie snow! Would It were millions of miles down helow! Here while we sit in a fit of the "hines." Longing and wanting to hear oll the news, Deepar and deeper it covers the ground, Until at length we ere reelly "snow hound;" Yet we are told with poetle glow, There is something sublime in this horrible snow 1

Poets have sung of the "heantiful soow," Making it jingle and rhyme to and fro, Singing its heauties in stroins so sublime, l'aluting it grend as a tropleal clime ; Sitting at case on a well cushioned cheir, Fire burning brightly and pleasant the air,

Concirning a froud they dub beautiful snow Its grand to the rhymster, who sits by the fire

And thumbs to its beenties the strings of his Its grand to the rich at their own firesida, Who knows not a want but to heve it supplied Who can loogh of the storm as it posses along,

And answer its shrick with a light hearted But ales! to the poor, when the winter winds There is little remance in the pittless snow.

There is a poor woman in the Ken-

YOUNG MEN

And the Quicksand of Society.

BY L. T.

[Areola (Ills) Record.] The follies and extravagances of the young men of the present generation, and the dangers that beset their pathway, is a subject of grave importance. So much has been spoken of them by abler tongue, and written by powerful pens-too often, alas! scorned and unheeded—that it is with doubtful heart and trembling hand I by request commence a subject of such importance to them and to our christian community. Alt! 'tis not the frivolties of fashionof which I have previously writtenthat engage our attention here, but our country's preservation; and who that looks reflectively on the young men "of to-day," can tell what it will be to-morrow?

When I look out upon the broad thorough fare and behold the restless throng that, from morn till night, pass and repass in the city streets, -each bent on his own course, full of his own cares, and with his own sins and sorrows locked in his bosom, while his face often betrays his reckless, or per. haps remorse or disappointment,-I which so many young men rush on, eager to grasp whatever this fleeting life affords, -regardless of the warning of friends, or the dangers that deck their way in city life. Ah! how sad a Then they can write anything they don't reflection on "the coming man," to see among these so many youthful faces prematurely ripening into maturer crime! Yet so enticing are the flattering inlets that leap, with airline rapidity, tothe gulf of destruction; so absorb ing is the influence that surrounds them, drawing them down-down to ruin,that they are deaf to the voice of warning till too late for their escape.

> My dear young friend, pause in your perilous course for a moment, and listen to the voice of warning. Look down on your flowery pathway and behold the hidden death-streams beneath your feet. See the horrid faces that glure on you as you pass? the bold, reckless looks; the haggard, vagabond, forms; the bloated face and staggering step that invites your scorn and derision? Aid these are examples of the depths to which they lead companions in the downward course; and the death-cry of millions, already stragling in the quicksands of destruction, warn you of your

pending peril! The popular places of amusement of the day, -inuocent as they are deemed aud essential to mental culture, are too often fruitful sources of ruin. Ali how little you dream of their absorbing influence! How steadily it creeps upon you as, with the gay and gifted throng assembled there, you drink in its flattering sweets, unconcious of the bitter poison beneath, and that the quicksands are gathering about your feet! But the broken Sabbath and the empty churh pews tell a more solemn tale; while a tortured death-bed, a flourishing grave, yard, and a crowded hell. wails the sad requiem of the followers of such danger and illusive paths. last accounts, the woman in question Now, of course you are morally disposed and there are places you avoid while there are others-not quite christianly-which you feel safe to visit till youth's follies are past. Ah, young mam! beware of the HIDDEN SNARE: in these lurk the most deadly peril. The Devil is quite up with the times in this day of invention, nor behind them in discerning the eravings of a restless humanity; so, in the snares laid to entrap you, there is no lack of variety, even for the most delicate fastidious sensibility. To the broad death-stream run many sparkling rivulets where they gayly step in and taste, with the flattering assurance that ger, till satiated and sickened at last. they turn toward the stepping stone, to find it has vanised, and instead, rolls the merciless gulf. And, with The walk on the Centennial the dark waves of destruction boiling grounds are being covered with a up to their view, and the death-shriek mixture of eight parts of pitch and of the lost sounding in their cars, they sixty-four of sand and gravel; a cheap awake to the startling conviction that they have unconciously floated far

they now cry for help; their only reply

is the derisivo laughter of wild exul-

lant fiends as they sink forever. Alt,

foremost in afl the glittering array. It has stood for ages, and so sure is its game-so fatal its effects, that concealment is not essential-nay advertisements jostle and batter each other as they swagger noisily through the streets. And the green folding doors that open so softly o'er the inner threshold of temptation-closing on so many victims for eternity, tell of quicksauds numberless as their lint measurable depths are treacherous and insatiable. How I shudder as I pass these fatal inlets that skirt the city streets, and hear, behind the frail screen, the gingle of glasses, the gur-

gle of flowing poison, and the confusion of oaths and angry, irrational voices, that reud the air! But how sad is the picture of "the coming man," as represented in the youths who, with faces that betray the ravages of the consuming tide, minglo with the doomed throngs that enter there! Ah what manhood is thus developed!

In a saloon window over the way is perched a large, foreign bird,—very natural in its majestic position and array, but dead. I do not know why it is thus placed on exhibition, but I am forcibly struck with the perfection by which the works within are typified by the death's heads without. Truly wonder at the thoughtlessness with it looks as grandly beautiful as when, with spreading wings and lofty beak, the deep blue sea-the swan's wild it soars in freedom above its native note proclaims it, as well as the clouds; but closer observation discovers | dark Fir branch when it elothes itself the stiffened limbs, the shrunken, sightless eyes, the ruffled plumage of death. So it is with the young man who visits that fatal bar. True, no change is apparent, at first; his step flashing waters are dashing down from is as light, his manner as gay, and his the mountain brow flinging their spray voice rings as merrily as when an innocent school-boy, he drank with his comrades from God's pure fount; but the quicksands are doing their work, and will finish it as surely as if, like the poor innocent bird, ho was shot from his native heights and placed on a pieture of hell. And like the butch

> advertisehis bloody profession. No warning however is heeded when once the habit of drinking is formednay, they would cross that threshold to get it, though their feet slipped in like spectacle, unrelieved by a cloud, the blood of saints, till their lips kissed save perchance a white downy mass of the unhallowed dust.

er, his victim hangs by his door, to

Americal representatives of our noble Republic! remember your responsibility as future governors of your country, whose prosperity, life-liberty perhaps-depends on your strong and steady arm! And oh! forget not, that whether it is ruled to misery and ruin, or prosperity and happiness, rests with the purity of your hearts and lives, and your God-given power, exercised, to avoid the quicksands that surround

you in society. Some business men would rather sponge on a country fence than pay a newspaper anything for advertising. which is so true that it is enough to make a printer crack himself on the head with the "shooting stick," or drown his ."devil" in the ink keg. Some "business" men will walk through the mud a whole day with an old paint pot in their hands, daubing upon every board they come to: "gO To SmIThS foR YouR lARD," when one soft dol lar would add several more lines and put them in decent shape in any respectable newspaper in the country.-Dover (N. Deferred Communications. UNWRITTEN MUSIC.

HY ELSIE.

What is it? Can it be the epirit of air holding sweet commune with the hearts of men? Or is it the alphabet of angels, wherewith they write upon the hills and plains the the mysteries of truth divine? Is it an imitation from the mind of God, by the sweet metody of which he would draw all things to Himself? Where shall we find it We have the magic symphonics of Un written Music reverberating through the trees, swaying their branches by its talismatic power, while it kisses the sparkling dew-drops from the leaves unfolds the delicate petals of the rose the gem of Queen Flora's crown. Th music of her song calls forth the gay flowers, the violets, the prim-rose, and the shadowy grass by thousands burst forth from their forest bowers, while the ancient graves and fallen fanes are veiled with wreathes of Druidical ivy and graceful vines. By the same sorceress, Unwritten Music, the virgin lily steps forth in all her regal beauty, the mblem of Purity and type of all that is lovely beneath the throne of God.

Nature's bosom is full of Unwritten Music. It is heard in the solitary bypaths of the woods, it is echoed by in a softer green. The same musical melody is heard when the crystal chains that had so long bound the streams, and fountaius are rent in twain and the over hill and dale, rushing along to the silver main, making such Unwritten Music that we feel ourselves as it were upon the ebbing and flowing sea of

As spring settles down on the lap of

summer, the music of Nature chauges its exhibition as a specimen of the skilled key. The Unwritten Music of summarskmanship of his murderer. Ah! mer breaks into bud and blossom at a death's bed is a true type of the every turn. Now we hear the music rumsellers work; and so is a coffin; or of gigantic trees towering aloft interlaced with ereeping vines; strong shrub of fanciful forms and huge dimensions. while at their feet glitter thousands of splendid flowers wherever fall the gorgeous sunbeams. There stretches the blue canopy of heaven as a dreamvapor seems to sleep in semblance of Oh how perilous your pathway! huge celestial temples of white. Tis how thoughtless you dance over the now, too, we eatch the matin hymn of flowery swamps till the quicksands are countless songsters, or the hoarse cry about your feet! Young men of of savage beasts coming from a wilder ness of aromatic shrubs and gently fluttering palm branches moved by the winds of summer. The wind is a a fit ful musician. You may go forth when the tempest is up, and hear the strong trees moaning as they lean before it, and the long grass hissing as it sweeps along with its magnetic power. But the tornado bursts with appalling fury; the rain pouring down in torrents masses of shrubbery swaying back and forth in the light of fallen bolts; peal on peal rebounding rend the poles, and playing upon the trunks of trees, which it uproots in its mighty course, as up on the strings of a Mammoth Lyre. The read in the starm may hand and quiver, then rise again, but the oak must shiver l The storm king departs, and the Unwritten Music is like to the muffled tread of the bier, and only the drippings of the water which linger on the leaves are heard in the awful still ness that succeeds the storm, the sun breaks through the clouds, filling the forest aisles with light; myriad jewels glitter on every side, the little chorissel, the summer day is closed! The deep hush of Nature is so solemn that we feel like laying a finger upon the lips of Creation to prevent a disturnance! There is a melancholy music in autumn l The leaves float sadly about with a look of peculiar desola. tion, monning capriciously in the wind,

my mind, I can tell you!" said a conceited fop. "It's always so when the stock of material to make up is small,' down into the submerging deathstream, and their feet are already engulfed in the creaping sands. In vain

is a very sigh for its sadness. There their own, and they float on the light Auna Dickinson says she has had derings, at times assuming fantastic is scarcely any man who may not atscheations in her head. There was a shapes of ruined castles or time-worn tain to greatness of one kind or another This, then, would make a total of eigh-

nal that binds the brow of a fair young gueen. Where can we find music so melancholy sweet as the Unwritten Music of autumn?

Again, listen to the soft soothin: music of winter. The unobtrusive and sweet music of the falling snow. Its low murmur will temper the heart to its earnest moods, and only obtrudes itself upon the ear when thought comes languidly and realizes our dreams of another world, where music is intuitive and all unwritten. The frost too has a melodious minstrelsy. Its crystals will shoot in the dead of night, as if moonbeams were splintering like arrows upon the ground, and it certainly is one of most cunning and beautiful of Nature's deep mysteries. We gaze on its exquisite beauty, listen in mute wonder to the noise of its invisible workmanship, but the inquisitive eye of the Philosopher has never yet penetrated the arcana or handled the tools of its Master Architect | Music, volumes of Unwritten Music lie upon the white bosom of winter. Before the keen frosts, and while yet the warm winds are stealing back like regrets of the deas the morning stars.

THE POWER OF THE WILL.

BY T. E. RICHET.

When Peter the Great was casting simply the result of observation in a his eye over his vast empire in quest of city where all kinds of people are a site for a capitol he fixed upon a bronght in contact, and watched and morass half under water and without their actions noted by your humble wood, stone, or clay suitable for build- servant, who never views an action ing material; with a soil almost desti- without studying its purpose; and the tuto of vegetation and a climate re- actions of mankind surely travel in one sembling the poles in severity. Common Sense In Plowing.

Teams drawing heavy loads on The food for fowls intended to be fatthe roads get a breathing spell tened should be ground oats mixed on the descending ground, while in with skim nulk, this feed should be plowing is the same from morning till given them three times a day, and night. There is a certain number of pounds that a team can draw from day after day and not weary them, but if more be added, even as little as titieen or twenty pounds, they walk unsteads ily, fret and soon tire. No amount of marity-no cramming is needed - they feeding will keep them in good condition. I have many plows in use on which it is an easy matter to decrease the draft twenty-tive pounds and if men had been drawing them instead of horses it would have been done. It must be plain to the farmer that every pound taken from the draft of the plow is so the milk one-third in two weeks. The much gained for the horses. It may owner resumed the milking, and be do :e in this way: For any soil except two meeks got the same as before.sand or gravel use a steel plow. The Afterwards he set a hired man to milk cost is but little more, and the draft and he shrunk the milk ten per cent enough less to pay the difference in in two weeks, and in two weeks more plowing twenty acres. In plowing the owner milking again, as much a sod the colter does a great deal of the before. This man does the wor work, and should be kept sharp by quickly and milks very clean. He Riley's forging at the blacksmith's, and grind eloses the forefinger and thumb around Lisemor's ing every day if necessary. Of course the teat high up, and makes a down- laland it will wear out sooner, but new colters ward motion, tightening the grip and ure cheaper than new teams. Set the forces out the milk: then lets go his colter in a line with the plow, the edge hold, keeping the finger and thumb in square in front, with an angle of forty- circle, carries up the hand and presses five degrees from the point to where it smartly against the udder and closes it is attached to the beam. When the until done. The philosophy, if any, is share gets worn out it is poor economy to give, as may be, the same motion to use it any longer, but replace it that the ealf does sucking. with a new one. Let the traces be as short as will allow the horses to walk without hitting their heels against the whiffletrees; and have just pressure enough of the wheels ou the ground to make the plow run steady. If the handles crowd continually one way, the draft is not right, and, if the plow be deaden the pain of an ordinary sting, a good one, it can easily be remedied and stop the swelling, if at once applied. at the clevis. To prevent the horses stepping over the traces in turning, fasten a weight of about three-fourth of a pound on the ontside of each singletree-that is, on the right end when you turn to the left, and vice versa .-Every observing farmer knows that consequently a news or voin is often horses are susceptible of kindness, and stung. In such a case extract the sting MRS. WARFIELD'S NEW BOOKS equally so to unkindness. I have at once, apply the turpentine to the seen horses that were working steadily wound, bathe the wrist, the elbow and made reckless with sweat in a short the under part of the arm with the same, time by a sharp word or a jerk at the bit. Let your horses do their work as you do yours, as easily as possible, and ten years and always found it reliable. be as willing to overlook their mistakes as you would the mistakes of kuman beings.

king about six pounds of butter per fins fruit. week, besides supplying new milk and cream for a gentleman's house with sixteen inmates. The pumpkins are chopped up in mangers with a spade, know to be very superior, having morning, noon, and night, about a tasted its fruits in our own family: half a bushel each time when cut into pieces: They eat while being add 2 cupsful of sugar, 2 lemons grated, milked, morning and night, and they and a tablespoonful of eorn starch, come to the yard and go into the stathen best again, after which stir in 2 ble for half an hour at noon. Beets, cupsful of sweet milk; divide the above carrots, and some other roots and into two pies and bake, while baking, s nall ears of corn will follow, so as to beat thoroughly the whites of the eggs keep up the milk during winter .- Cor. with a cupful of fine pulverized sugar of Country Gentleman.

Exposing Potatoes.

It is a great mistake, says the Indiana Farmer, in handling potatoes to allow them to be exposed to the sun, especially when the potatoes are tender. In digging have baskets of convenient size at hand, and, as fust as you can dig, put in barrels and cover up; transfer them fresh to market or to a room where they may be emptied out upon a floor to dry in the shade. Potatoes exposed to a hot sun when packed in barrels and shipped will speck and rot; oftentimes the shipper will fose an entire shipment, and besides, the consumer will find such potatoes stale and frequently tinged eight corn meal to make a stiff batter; with a bitter tasto.

A valuable Suggestion.

A gentleman who lives on Dix Riv er, in Lincoln county, and who always raises a good crop of fine, large head cabbage, says that he has never been able to do it without applying a heavy the plants were put out. He says that glass full of cold water. a wagon load of such manuro to every one hundred square feet, will insure a water cleans very dirty linen with half fine yield .- Standard.

Fattening Fowls.

In the best process of fattening fowls | Louisville, Paducah & Southwestern as little room as can be-just enough rives at for the number to stand up, but not enigh for anothing like exercise. If beitchfield at four are allowed the same space that would serve for a dozen they will not Bockport at fatten as soon or as readily; therefore AGRICULTURAL: a space of the fattening coop should be divided off, and this should allow them only room enough to stand .mixed to such consistency that when it is spread on a board it will not run

off. We have fed ground corn and oats with good results, mixed to the same consistency. If fowls are fed with regwill fatten in two or three week's time. Fowls fed on corn alone will not fatten as well as on the food we have

REPRESENTATIVE AND CHAMP. ION OF AMERICAN ART TANTE

PROSTECTUS FOR 1875-EIGHTH TRAR.

THE ALDINE THE ART JOURNAL OF AMERICA.

1800AD MONTRLY.

MAGNIFICANT CONCEPTION WON-DERFULLY CARRIED OUT.

The necessity of a popular medium for the representation of the productions of our great artists has always been recognized, and many attempts have been made in meet the went. The enecessive failures which have so leavariably followed each attempt in this country to cetablish an art journal, did not prava the Indifference of the people of America to the slaims of high art. So soon as a proper appreciation of the went and an ability to meet it wave shown, the public at one a railled with anthesisom to its support, and the result was a greet artistic and conversed trimmph—THE ALDINE.

The Aldine while issued with all of the requierity, has none of the temporary or timely interests obstractaristic of ardinary periodicals. It is an elegant miscellany of pure, light, and graceful literature, and a collection of pictures, the rarest collection of artistic skill, in black and white. Although anch uncoording number affords a fresh plusaure to its friends, the real value and beauty of The Aldine will be most appreciated after it is bound up at the close of the year. While other publications may claim superior chapmass, as compared with rivals of a similar class. The Aldine is an anisonance.

appreciated after it is bound up at the close of the year. While ether publications may claim superior changnase, as compared with rivals of a similar class. The Aldine is a unique and original conception—alone and unappreceded—absolutely without competition in price or character. The possessor of a complete velume cannot deplicate the quantity of fine paper and engravings in any other shape or number of volumes, for ten times its cost; and then, there is the chrome, besides!

The national feature of The Aldine must be taken in no narrow sense. True art is cosmopolitan. While The Aldinais a strictly Amariran institution, it does not confine itself to the approduction of active art. Its mission is the callivate a hroad and appreciative art tasts, and that will discriminate on grounds of intrinsia merit. Thus, while pleading before the patrnes of The Aldine, as a leading charcotaristic, the productions of the most noted Amariran artists, attention will always be gione to specimens from foreign courses.

planeare and instruction obtainshie fram hema or foreign conres.

The artistic illustration of American scenery original with The Aldine is an important feature, and its magnificent plates are af a size more appropriate to the satisfactory treatment of details then can he afforded by any infarier page. The judicious interspersion of landscape, marine, figure and animal subjects, sustain an analysist, interest, impossible where the scepe unnhaled interast, impossible whara the scope of the work coofines the artist too closely to n single style of subject. The literature of The Aldine in a light and graceful accompaniment, worthy of the artistic features, with any such Joshnical disquisitions as do not interfere with the popular interest of the work.

PREMIUM FOR 1875.

Every subreiber for 15:5 will receive a beautiful portrait, in oil co'ors, of the same noble-ing whose picture in a former issue attracted so-much altention. "Man's Unselfish Friend" will be welcome to evary hame. Ecarybody

minm chromo will have the slightest foar of being hitten. Besides the chrome avery advence schoolibes
